Senior Android Engineer

Summary

I build reliable Android payment apps in Kotlin. I focus on fast startup and accessible checkout.

Experience

Senior Android Engineer, Northwind Payments Apr 2022 – Present

Berlin

- Cut cold startup from 2.5s to 1.5s, measured with Macrobenchmark.
- Rebuilt checkout in Jetpack Compose and reduced checkout crashes by 38%.
- Led staged releases for four apps using Firebase Crashlytics.
- Mentored three engineers and added accessibility checks to code review.

Android Engineer, Acme Payments Mar 2018 – Mar 2022

Hamburg

- Built card payment and transaction history features in Kotlin.
- Cut Gradle build time by 40% in CI with dependency caching.
- Replaced duplicate background jobs with a WorkManager queue.

Junior Android Developer, Brightline Apps Jul 2016 – Feb 2018

Berlin

- Shipped offline access to saved routes in a transit app.
- Added UI tests for sign-in and trip search before weekly releases.

Projects

Compose Performance Toolkit, Open source

- Published reusable benchmarks for startup and scroll performance.
- Added CI examples for tracking frame timing across releases.

Skills

Languages: Kotlin · Java **Android:** Jetpack Compose · Coroutines · Room · WorkManager **Delivery:** Gradle · GitHub Actions · Firebase Crashlytics

Education

B.Sc. Computer Science, TU Berlin 2016

Languages

English (fluent), German (professional)
